UNIT                                LOAD    ACTIVE SUB    DESCRIPTION  
accounts-daemon.service            loaded active running Accounts Service  
avahi-daemon.service               loaded active running Avahi mDNS/DNS-SD Stack  
chrony.service                     loaded active running chrony, an NTP client/server  
colord.service                     loaded active running Manage, Install and Generate Color Profiles  
cron.service                       loaded active running Regular background program processing daemon  
cups-browsed.service               loaded active running Make remote CUPS printers available locally  
cups.service                       loaded active running CUPS Scheduler  
dbus.service                       loaded active running D-Bus System Message Bus  
fwupd.service                      loaded active running Firmware update daemon  
gdm.service                        loaded active running GNOME Display Manager  
ModemManager.service              loaded active running Modem Manager  
networkd-dispatcher.service         loaded active running Dispatcher daemon for systemd-networkd  
NetworkManager.service            loaded active running Network Manager  
open-vm-tools.service              loaded active running Service for virtual machines hosted on VMware  
polkit.service                     loaded active running Authorization Manager  
power-profiles-daemon.service        loaded active running Power Profiles daemon  
rsyslog.service                   loaded active running System Logging Service  
rtkit-daemon.service               loaded active running RealtimeKit Scheduling Policy Service  
snapd.service                     loaded active running Snap Daemon  
switcheroo-control.service          loaded active running Switcheroo Control Proxy service  
systemd-journald.service            loaded active running Journal Service  
systemd-logind.service              loaded active running User Login Management  
systemd-oomd.service               loaded active running Userspace Out-Of-Memory (OOM) Killer  
systemd-resolved.service            loaded active running Network Name Resolution  
systemd-udevd.service              loaded active running Rule-based Manager for Device Events and Files  
udisks2.service                    loaded active running Disk Manager  
unattended-upgrades.service         loaded active running Unattended Upgrades Shutdown  
upower.service                     loaded active running Daemon for power management  
user@1000.service                  loaded active running User Manager for UID 1000  
vgauth.service                     loaded active running Authentication service for virtual machines hosted on VMware  
wpa_supplicant.service              loaded active running WPA supplicant  
  
Legend: LOAD    → Reflects whether the unit definition was properly loaded.  
          ACTIVE → The high-level unit activation state, i.e. generalization of SUB.  
          SUB     → The low-level unit activation state, values depend on unit type.  
  
31 loaded units listed.
